SUMMARY

Python Backend Developer with hands-on experience building RESTful APIs and backend services using Flask and Django. Strong foundations in object-oriented programming, data structures, and SQL-based database integration. Focused on writing clean, scalable, and secure backend code, with practical project experience translating requirements into reliable technical solutions.

SKILLS

Python, Flask, Django, Rest API Integration, Large Language Model, GIT Version Control, Pandas, Numpy, Windows, Linux Ubuntu, OOPS, Data Structures And Algorithms, SQLite, MySQL, HTML And CSS, Bootstrap

English, Hindi, Marathi

PROJECT

Chat with Einstein LLM-Based Chatbot

github.com/Rohit-more-2003/AI_Chatbot • December 2025 – January 2026

- Engineered a secure, persona-driven conversational chatbot modeled after Albert Einstein utilizing Python, LLM.
- Implemented conversation memory and prompt chaining using LangChain.
- Integrated Google Gemini API for fast and accurate responses.
- Built an interactive web interface using Gradio.
- Ensured secure API key handling through environment variables and modular backend design.

Motion Detection & Alert System

github.com/Rohit-more-2003/Motion_Detector_App • December 2025 – December 2025

- Tools and skills: Python, OpenCV, SMTP and NumPy.
- Engineered an integrated motion detection and alert system by synchronizing real-time image processing, automated notifications, and backend efficiency improvements using multithreading.
- Implemented automatic image capture and email alerts with attachments using SMTP.
- Used background threading to ensure non-blocking backend operations.
- Focused on performance optimization, error handling, and graceful application shutdown.

Restaurant Menu

github.com/Rohit-more-2003/Restaurant-Menu-django • November 2025 – December 2025

- Built a backend-driven web application using Django for managing and displaying restaurant menus.
- Designed database models and integrated SQLite for persistent data storage.
- Implemented QR-code-based menu access for seamless user experience.
- Followed Django's MVC architecture for clean and maintainable backend code.
- Engineered an intuitive administrative dashboard enabling real-time updates to menu items, categories, and pricing while maintaining robust access controls.

EDUCATION

Bachelor of Technology in Electrical Engineering

Indian Institute of Technology, Dhanbad • Jharkhand, India • 2025 • 5.92/10

HSC in CBSE, English

Jawahar Navodaya Vidyalaya, Bhusawal • Jalgaon, Maharashtra • 2020 • 86.8%

SSC in CBSE, English

Jawahar Navodaya Vidyalaya, Bhusawal • Jalgaon, Maharashtra • 2018 • 90.4%
